BACKACHE IS DISCOURAGING

But Not So Bad If You Know How to Reach the Cause.

Nothing more discouraging than a constant backache. Lame when you awaken, pains pierce you when you bend or lift. It's hard to work or to rest. Backache often indicates bad kidneys. Norway people recommend Doan's Pills. Read this case.

Mrs. G. D. Frost, 6 Tucker St., says: "Doan's Pills helped me wonderfully and I take pleasure in recommending them. My back gave me trouble and there seemed to be a deep seated pain across the center of my back. My kidneys didn't act regularly and in other ways showed signs of disorder. As Doan's Pills had been used in the family with good results, I decided to try them and sent to Noyes Drug Store and got a box. After using them, the trouble left me entirely."

SUMMER

Summer Hill
Bonney-Parlin

An attractive wedding took place Saturday, June 14, at high noon when Miss Laura A. Parlin, only daughter of Mr. and Mrs. Dennis Parlin, became the bride of Paul E. Bonney, son of Mr. E. Bonney, at the bride's home on Summer Hill.

Rev. W. K. Houghton performed the double ring ceremony in the presence of about thirty guests. The couple were attended by Miss Dora Bonney, sister of the groom and Howard Parlin, brother of the bride.

The bride was charmingly attired in white crepe de chine with a veil held in place by lilies of the valley and carried white daffodils. The bridesmaid, a sweet girl graduate, was simply attired in the valley. Lohengrin's wedding march was played by Miss Margaret West, cousin of the bride. The bridal party stood underneath an arch of pine and apple blossoms from which was suspended a wedding bell of white lilies.

The house was beautifully decorated with flowers by Mrs. Stella Cobb and daughter. The many beautiful gifts from the friends and relatives were on display. Light refreshments were served after the ceremony.

The bride's going away gown was a suit of tannish polka with hat to match. Mr. and Mrs. Bonney departed for parts unknown amid a shower of confetti and the best wishes of many friends. They will reside at the Bonney farm in Summer.

Cuts Better Lasts Longer

You will appreciate the John Deere Mower the moment you see it in action. You will notice particularly its simplicity, its great cutting power and the ease with which it is handled. These advantages, combined with the extra years of service it gives, makes the John Deere a mighty profitable mower investment.

JOHN DEERE MOWER

The Mower with the Balanced Gears

The driving gears on the John Deere are balanced—one set offsets the thrust of the other set. This eliminates side wear and strain. This mower transmits maximum power to the high grade carefully-fitted knife—that's why the John Deere does a better job of cutting and pulls lighter.

Another feature—if after years of use, lag develops in the cutter bar, this can be taken out—the bar is aligned by a simple eccentric adjustment. The John Deere handles easily. The bar can be raised high with the foot lever to pass over ordinary obstructions. With

the hand lever an extremely high lift can be secured quickly and easily.

It's no job to keep the John Deere in good running order. All parts are easily replaced; adjustments easily made—its simplicity is a real feature.

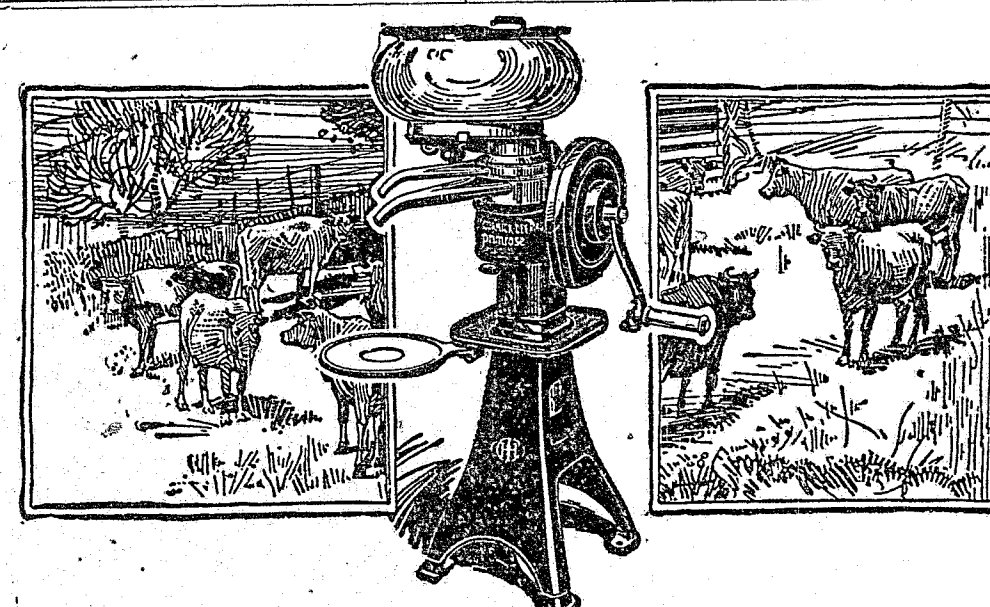

Be sure to see this mower before you buy.
It's the best mower we have ever seen.

GEORGE PATCH'S GOLD

(By Fred M. Davis)

(Written for the Advertiser)

"Nearly everyone who has ever lived
near or at Greenwood, Me. for any length
of time has heard more or less about the
gold of George Patch," I said, as I sat
in Dan Herick's kitchen, a man who has
lately become a resident at Norway.
Knowing that Dan was something of
an historian and a pioneer of early Patch
Mountain days, I was glad to have an
evening with his friendly fire on a cold
winter night and listen to a talk of
the first settlers of Greenwood.

It has been my good fortune to visit
this spot on the mountain where the
house once stood but it has since gone
to decay or been taken down and moved
above is situated near the highest part
of Patch Mountain and without question
affords a lookout for mountain scenery
that is interesting.

The old cellar wall has been removed
and each cobblestone has been handled
over one by one and men have dug,
searched and looked near and far for it.
It is well known that gold is buried there.
"Well," said Dan, "no doubt, but
what I can tell you as much about the
gold as anyone else, as my father worked
there years ago and I well remember
instance that happened there."
"He said that one day when George
Patch had been gone all day, he returned
all of a reeking sweat and told his wife,
Tryphosa, that their boy had got all of
their money he would ever get and that
high carnival as he was a high flyer, so to
speak.

"I believe the story that a fortune is
buried there," said Dan, "as I remember
of father saying that one day in summer
he was called from the field and after
Patch brought out from an adjoining
field a canvas bag that was filled
with gold." Dan, like others, has search-
ed more or less for the precious coin and
no one who knows anything about the
proceedings could have a doubt but that
his story is true. He says that the
settle in Greenwood and they brought all
their worldly possessions with them on
horseback. They built the first house
on Patch Mountain but before it had a
chance to fall it was bought and moved
away by Charles Verrill, who now owns
the first house built on the mountain;
just that use it was put to we are un-
able to say.

Dan tells the story that Jock Yates
used to cross between Hick's and Mun-
son's on the way to church but generally
carried a fish line in his pocket. He says
that one Sunday Jock failed to get to
church and when asked why he did not
come he said an old she bear treed him
and he had to stay there all day. Dan
does not think he was a natural liar but
just had a habit of stretching the truth.
"No, that job of tattoo work was
never finished," said Dan, pulling up his
sleeve, "it hurt me so like blazes I could
not stand it," and went on to tell how
it was done years ago when he worked
at Portland unloading vessels as a long-
shoreman. He spoke of many rough en-
counters that he had experienced at the
rocks and I admitted that the life of a
longshoreman was considered a tough
proposition. He says that all the fishing
tackle they had to use in early days at
Greenwood was a line of twisted cotton
yarn or flax and a bent pin.

"Speaking of large old fashioned chim-
neys," said Dan, "did you know that all
the brick that was used to build most of
the houses in Greenwood and the farm
houses in the adjoining towns were made
here at North Norway?" and continued
to tell that a brick kiln was running
full blast there years ago on the lot
between the Will Pierce farm and the
town line between there and Greenwood.
Dan states that the brook that forms
the line of the brook itself was at one
time full of blue clay.

I listened while he told how Bill Cay-
ton at Greenwood eluded the officers in
time of the Civil War and how the women
and girls carried food while he camped
under Overst Mountain.
All his life Dan has been engaged more
or less in wood carving and can well be
called a jack knife artist. He was ab-
sent from the room for a short time but
soon returned bringing an assortment of
articles made of wood and displayed
them on the dining table. Among the
others was a complicated baby's rattle,
a perfect drinking mug, grooved and
figured to represent a glass tumbler.

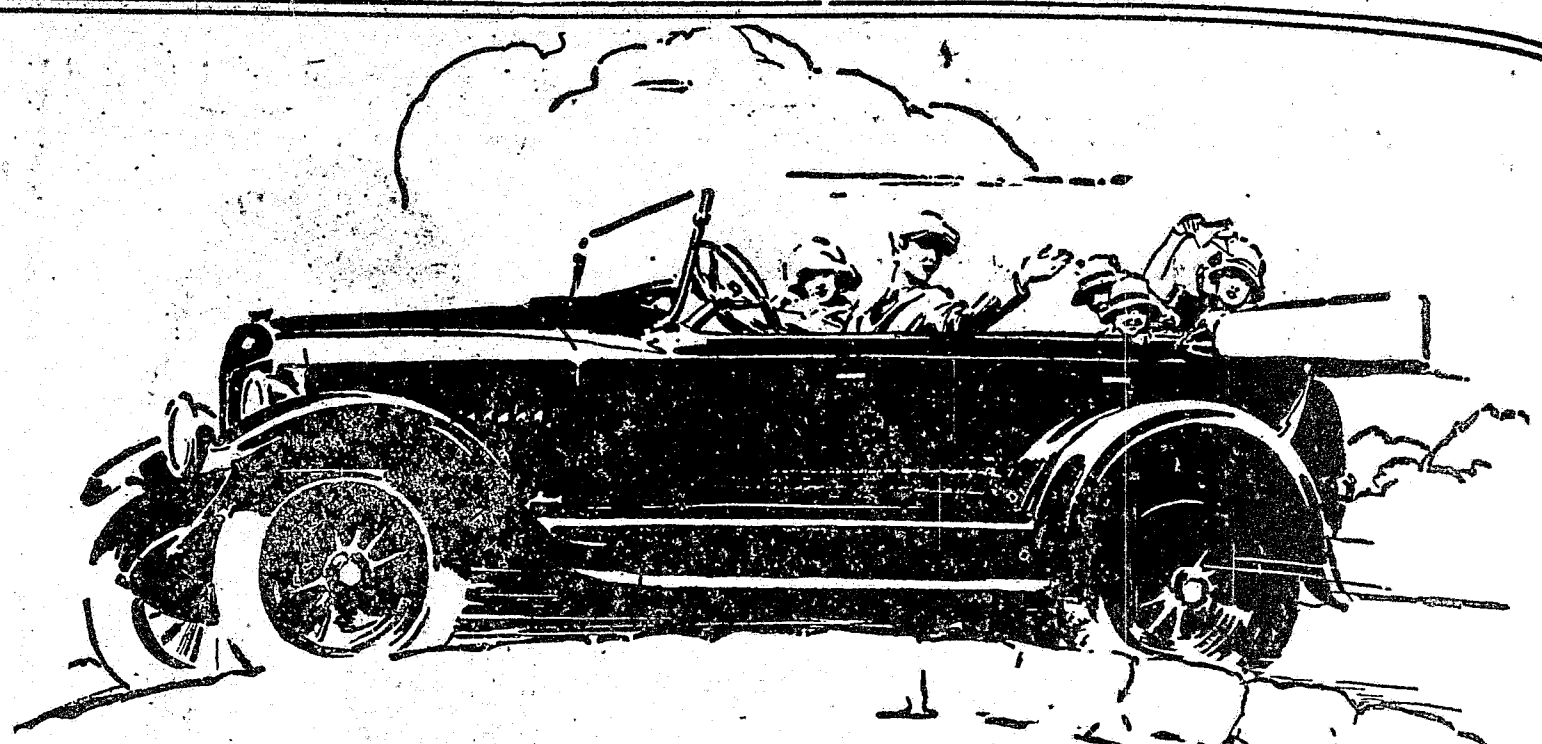

A glass vase that contained a reel filled
with cotton to represent yarn that he
showed me, told that it was the work of
a true genius. Another piece was a
bracelet, also one specimen that resembled
a caterpillar as much as anything I
had ever seen.

"Some of the first people," he says,
"to settle in Greenwood were Elijah
Cordwell, George Patch, Willard Her-
rick, Loring Roberts, Al Whitney, Wil-
liam Cayton, Joseph Emmons and Luke
Morgan; also the Leavitts and Pea-
bodies were among the first settlers."

"George Patch told his wife that he
buried the gold under a rock that was as
long as she was tall," said Dan, and de-
clared that he had hunted some himself
and thinks he can go to the spot where
the gold is buried but could never get
anyone to go with him to dig for it.
He says that the late Dr. Bernard of
Norway and also Lewiston people have
as far away from Massachusetts have taken
their turn with spade and shovel.

After putting a log on the fire Dan
settled back in his chair and related to
me that his first wife came to him through
rather an unusual romance. He first
saw her face while on the Grand Trunk
train from Portland. She was fresh
from Boston. She presented him with a
book and their second meeting was their
wedding day. He has been a hard work-
ing, industrious man, having worked at
the South Paris sled shop in early life
and at one time operated a turning lathe
at Bethel. He says he is a little home-
sick but still owns his farm at North
Norway. He was enlisted and served
in the war of 1861 under the direction
of Captain Amos Noyes of Norway. He
lost one son in the world war, he was not
brought home as Dan thought that his
sleep would be as peaceful there as it
would be if brought back to the states.
He says he has got two as good boys as
travels, has had eight children, has been
twice married.

"Going back to the gold section I will
say that at last accounts two stately elm
trees still stood as silent sentinels at the
home place but like the hills, they only
laugh in mockery at those who come to
seek the hidden treasure.
